### Instruction manual barbecue Xantos

#### Important:

- Only use the pressure regulator supplied with the appliance
- Only suitable for propane gas and outdoor use
- Always keep gas cylinders upright during usage and storage; this also applies to empty cylinders
- Some parts of the barbecue may become very hot
- Always close the cylinder valve of the gas cylinder after usage or in case of emergency situations

#### Installation/assembly:

- Open the lid at the top of the box and take out the 4 legs
- Install the legs and close the lid using both clasps
- To put the barbecue upright, lift the box by both handles on the sides. This requires 2 people
- Open the lid of the box once again and slide the box off the barbecue
- Attach the pressure regulator to the gas cylinder; there must be a rubber seal ring between the cylinder and the regulator (note: left-handed thread)

#### Starting up the barbecue:

- Open the cylinder valve of the gas cylinder
- Push in the control knob in OFF position, keep it pushed in and turn to MAX, gas will start to flow
- Keep the knob pushed in; release after 15 seconds
- Size of the flame can be adjusted to your preference by turning the knob counter clockwise, towards MIN

#### Using the barbecue:

- The grills of this barbecue do not require greasing, the products will come off by itself; however, we do recommend greasing if you are preparing fish or other similar food products.

#### Switching off the barbecue:

- Turn the control knob to OFF
- Close the cylinder valve of the gas cylinder

#### Troubleshooting:

- If the burner accidentally breaks down; wait for 10 minutes before turning on the barbecue again

#### Maintenance/disassembly:

- This barbecue has a self-cleaning feature. To start this process, let the barbecue burn on maximum capacity for 10 minutes. This will burn away and evaporate any greases and residues.
- Do not use any aggressive cleaning products. The barbecue can be cleaned with a damp cloth once it has cooled down.
- Disassemble in reversed order: slide box over the barbecue, attach the lid, turn barbecue upside down, re-open the lid, remove the legs and store them in the box next to the barbecue, close the lid.
